DETAILED ACTION

REQUIRED SPECIES ELECTION

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A (claims 3, 5, 14, 15, 23, and 24): the three-dimensional structure is the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A,

Species B (claims 7, 17, and 26): the three dimensional structure of the tyrosine kinase domain of the IGF1 receptor is selected from the group consisting of an ATP-binding pocket, a peptide substrate binding grove, a hinge region on the backside of the kinase domain, and an alpha helix C.

The species are independent or distinct because: Species A is limited to the entire three-dimensional structure of the tyrosine kinase domain of the IGF1 receptor described by the coordinates of Appendix A, and is representative of the entire tyrosine kinase domain of IGF1. In contrast, Species B is limited only to the three-dimensional structure to the subdomain selected from the group consisting of an ATP-binding pocket, a peptide substrate binding grove, a hinge region on the backside of the kinase domain, and an alpha helix C. As such, species A and species B are mutually exclusive. Further, the search required for all the above identified species would not be coextensive in scope and therefore present an undue burden of search if searched together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 4, 6, 8-13, 16, 19-22, and 27-32 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
